Best UK/Thailand Money Transfer Service 2018

UK

A&B MONEY
WE SEND MONEY HOME

A&B General (UK) Limited, the foreign exchange broker under trading name 'ABFX' continued the reign supreme triple champ 'The Best Money Transfer UK-Thailand' in 2015-2017. Once again in year 2018, 'ABFX' continued the leader of specialist Thai Baht who based in London since 2009.

CEO: Chakree Chankana said -
This year is one of the most difficult time for us to survive under the bank crisis during the 'Brexit'. About Thai people who lived in UK & Europe are similar with other foreigners from around the world who lived in a big city and worked hard abroad and send money home. They need to 'working double shot' to have the same value after currency converted for their beloved one in the homeland.

Sadly, as long as the game run as hard as the middle man just like 'Banks' or 'Acquirer' give us the small way to go, they left the money service business sector (MSB) going down and disappear from the markets. All tariff price and rules more restrict and goes salty. But in the same time, I have seen the value of the pound sterling and euro going weak each more day.

I look back myself since we expanded markets to Berlin, Germany and Stockholm, Sweden. The business markets are not all options we decided to go, but we would like to spread the risk under period of Brexit time. We know the common rules that all the business in the world will end up with the bank. However, as the finance business, we cannot rely everything with only one bank we trust with, as same as we cannot stand for a long run by only one leg.

We have successful opening MSB accounts with 8 major banks around the world this year. Those made us more competitive in the markets, our customers can have better price from currency exchange that we very selected from the currency owner, but game start boring which everything must end up under the bank's rules.

Yes – I accepted, ABFX has experience bank closed down when HSBC decided to withdraw from FX Markets. It's very hard time, I can say… But we have survived from the crises and become solid when we have a number of banks in our hands. Unfortunately, I've seen our clients start disappearing one by one from the bank closing down their accounts with unfair and none reasonable.

Why we don't become the account provider ourselves? - This question was rung up in my head. I started this project since 2016, All compliance researching and all solutions is end up and along under high street banks and local bank's criteria which it not solving the issued for our clients.
We decided to connect the most powerful in the world who's money flows around the world under name 'MasterCard'. Over 40 meetings in 2 years, we build up our own data system and connect API integrations with Mastercard completed in 2018.
We are proud to become to first account providers for Thai markets in UK & Europe who's able to opening a bank account under GBP & EUR currency in one card. Our clients do not headache and fussy with local banks anymore, they can open an account with us and manage via online banking & app power in their fingers. Our clients can shop worldwide or cash withdrawn from cash machines (ATM) secured under the power of Mastercard.
For my personally opinion: I am glad that I can keep my promise to our clients from last year. And we have so proud that 'ABFX' can solve the banking issued in UK & Europe who unable to open an account because of credit score or financial record included with the account closing down the problem.
